## Game of 24

Do you guys have a favorite number? Personally, mine is 24. As such, the name of this round is the Game of 24. Basically, the aim is to somehow use basic operations (addition, subtraction, multiplication, division, parentheses, and exponents) to turn four numbers into 24.

Just write a mathematical way to form the number 24 out of each set of four numbers in the answer key (there are multiple answers)! You must use each number one and only one time.

Seriously though, what's your guys' favorite number? ... Actually, I don't want to know. It's more than likely the number you're thinking of is...inappropriate. :(

Good luck!
